Hacettepe University, Institute of Science, Department of Actuarial Science offers Masters (M.Sc) and Doctorate (Ph.D.) programs. The founding purpose of the department is to equip the students with the skills required to access information, evaluate and interpret knowledge and do scientific research, and therefore the department provides advanced level of knowledge and skills in Actuarial Science.

The students who successfully complete these academic programs are eligible for the diploma granted by the program.

Admission, registration and approval procedures and education shall be carried out according to relevant provisions of Hacettepe University Graduate Education and Examination Regulations.

Students who hold a bachelor’s degree from the Department of Actuarial Science, Statistics, Mathematics, and departments offering at least 4-year undergraduate education of which academic competence is approved by the Departments Academic Council may apply for the MSc. program. Students who hold a master’s degree from the Department of Actuarial Science, Statistics, Mathematics and the other departments whose academic competence is approved by the Departments Academic Council Council may also apply to the Ph.D. program.

Courses in each semester are determined by the Departments Academic Council.
